This report is based upon geographic, demographic, and medical data reported in birth, death, fetal death, marriage and divorce records filed with the Bureau of Vital Statistics. These data are required for planning, implementing, and evaluating health programs, for medical research, for estimating population, and for meeting other needs of governmental agencies and the private sector.

Historical tables are presented to show the trends in selected vital events during the past 35 years.

The Texas Department of Health takes pride in the timely release of its vital statistics data.

Texas Vital Statistics 1984

Natality and mortality data included in this report are classified by county and city of residence of the mother for births and fetal deaths and by county and city of residence of the deceased for deaths. Marriages are reported by county in which the marriage license was issued and divorces are reported by county in which the divorce decree was granted.

This report includes the vital statistics data most frequently requested. More detailed data are available from the Statistical Services Division, Bureau of Vital Statistics, Texas Department of Health, 1100 West 49th Street, Austin, Texas 78756. A fee may be charged for developing special reports.

Statewide birth and death rates are based on provisional population estimates published by the Bureau of the Census, U. S. Department of Commerce. The estimated population of Texas as of July 1, 1984, was 15,989,000.

The data presented in this report were compiled and tabulated by the statistical staff of the Statistical Services Division and by the Bureau of Automated Data Services. Artwork and printing were done by the Reprographic and Educational Services Division.
